

VBMS

Sustainability Policy Statement

VBMS wants to be the best in class total solution provider in the renewable, electricity and oil & gas markets, by proactively approaching our clients with solutions and services which will help them to achieve their business goals.

Corporate Responsibility (CR) for VBMS means accepting our responsibility to provide a positive contribution to our employees, the market, the environment and the community. It is our duty to remain a healthy business, that creates added value in the economic, social, ecological and community areas. The aforementioned areas are further defined as follows:

Our employees;

- Safety (No harm)
- Integrity
- Training & Development
- Diversity

Our clients;

- Innovation
- Improving effectiveness and efficiency
- Optimal balance between performance vs. costs
- Responsibility in the Total Supply Chain
- Supporting our customers in achieving their business goals

The environment;

- CO₂ reduction
- Resource management

The community;

- Community investment
- Stakeholder management

On a yearly basis CR targets are set for these themes to ensure continuous improvement.

The Managing Director is responsible that these targets are met and reported. A CR focal point is assigned to collect all required data which is verified by the Director Finance and spot-checked by an Independent Controller.

Managing Director VBMS
A. van Poppel
