

VBMS

QHSE Vision 2020

VBMS's mission states that: "VBMS wants to be the best in class, total solution provider; by proactively approaching our clients in the Renewable, Electricity and Oil & Gas markets with solutions and services which help them to achieve their business goals".

The VBMS vision states that VBMS wants to be "Become the best in class solution provider in the business of connecting power, from offshore to onshore grids".

VBMS recognises that becoming best in class requires all processes to be managed as safely and as efficiently and effectively as possible with no or minimal adverse impact on the environment.

Becoming best in class can only be achieved by operational excellence, thus having full control of our operations, subsequent processes and personnel which need to be resilient to the challenging markets in which VBMS is active. Control of hazards is the key to achieving this. Becoming best in class means VBMS achieves Operational Excellence by carrying out each task "First Time Right, Every Time".

VBMS has identified the following key focus points and its envisaged state for the coming years:

With Leadership based on the VBMS Values achieving Operational Mastery.

Values

- Proactive
- Innovative
- Aware
- Cooperative

Leadership

VBMS management and supervision demonstrate leadership that is visible and recognised throughout the organisation. This leadership consists of being proactive, competence driven and continuously trying to anticipate developments and events to ensure continuous operational excellence. VBMS management and supervision are responsible for maintaining a resilient organisation that will succeed in performing under varying conditions.

Operational Mastery

Operational Mastery is the day-to-day ability of everyone within VBMS to carry out their task "First Time Right, Every Time". All VBMS employees need to have a good understanding of everyday activities and subsequently ensure that every day, work achieves its predefined stated purposes. They need to be proactive so interventions can be made before situations arise that can affect performance or even halt it. VBMS employees are the cornerstone to the system flexibility and resilience of the operations.
